Note: Toward the end of this reporting period (Nov 27), there was a change to new WISCAT AGen software, where searches are counted against all Z39.50 targets, not just against the WISCAT physical union catalog; and staff logins represent logins for ILL management activity in addition to logins for searching; also, in many cases a library's name was changed or expanded, so for those libraries, results are displayed under both the old and the new library names.
